

## Quick Notes:

- Question about your bill?  
Email us: [Accounts@psh2o.com](mailto:Accounts@psh2o.com)
- Moving? Selling?  
Be sure to let us know!
- Payments are due by the 20th of each month and are subject to a late fee if not paid on time.
- You can always drop your payment in the green drop box, located next to the mailboxes near 2255 Redwood Drive.

**Did you update your payment amount?**

**Monthly Charge is \$125.52**

**Check your billing statement**

**Please check your bill and pay the amount due as shown. And, if you have automatic payments through your bank, please pay your current amount due and then adjust your bank payment, to ensure future amounts are correct.**

## Getting the Garden Ready

With spring on the way and with this beautiful February spring-like weather, you may be thinking about getting the yard and garden ready. Planting a garden or some trees, or maybe building a fence or deck. Here are some tips and reminders to help with your planning.

If doing any work near the street, be sure to call 811, Underground Service Alert, before you dig!

Make sure you know where your own water line and shut off valve are on your property before digging.

Plant native plants... they are adapted to California's climate, so they use less water and grow well.

Ask neighbors what grows well in their garden for ideas for your garden.

If you have sprinklers or a drip system, check all areas for leaks and repair them before planting.

**DO YOU SEE IT?**

**HAPPY  
ST. PATRICKS  
DAY!**

## Summer Gardening Tip!

When planting native plants, give them water initially, but then cut back and eventually water very infrequently, or no water at all, as too much water can actually harm your native plants.

## Leak Repaired! And Thank You!

Thank you for your patience last month while we repaired the leak in the water main under the road. Once the repair was complete, we saw an immediate drop in our well pumping data, which is great!

We appreciate everyone who: kept an eye on the leak until the Contractor could get there; drove carefully while the work was being done and while the lane was closed; and also those who helped with traffic control.

## “No Lead Service Lines” Declaration

PureSource Water has completed the initial lead service line inventory required by U.S. EPA’s Lead and Copper Rule Revisions. The deadline for the initial inventories was October 16, 2024.

Through completing a historical records review and field investigations, PureSource Water has determined it has no lead or galvanized requiring replacement service lines in its distribution system. This includes any privately-owned or customer-owned service lines.

PureSource Water reviewed all applicable sources of information, including the following:

- Construction and plumbing codes and existing records or other documentation which indicates the service line materials;
- Water system records, including distribution system maps and drawings, historical records on each service connection, meter installation records, historical capital improvement records, and standard operating procedures;
- All inspections and records of the distribution system that indicate service line material, including inspections conducted during the course of normal operations (e.g., checking service line materials when reading water meters or performing maintenance activities); and
- All records of service line or meter replacements previously conducted.

In addition to reviewing the above sources of information, PureSource Water physically verified all but a few service lines. All service lines inspected were verified non-lead, the vast majority being plastic. No lead or galvanized requiring replacement service lines were identified. One service connection was determined using an alternative method that was approved by the State Water Resources Control Board Division of Drinking Water.

Since October 2024 PureSource Water continues to document service line material information obtained from normal operations, such as service line maintenance, meter installations, or water meter readings, and will update the initial inventory accordingly.

If you would like more information about the service line inventory please contact PureSource Water at (831) 688-8476 or [martin@psh2o.com](mailto:martin@psh2o.com).

## FUN CORNER

Let’s dive into some silly water jokes! See what we did there?!? LOL!

Where can you find an ocean with no water?

What do mermaids sleep on?

What did one ocean say to another ocean?

Why do scuba divers fall backwards into the water?

On a map!

Waterbeds, of course!

Nothing, it just waved!

Because if they fell forward, they would still be in the boat!

Hope we added a splash of fun to your day!
