## HAPPY 25th ANNIVERSARY!

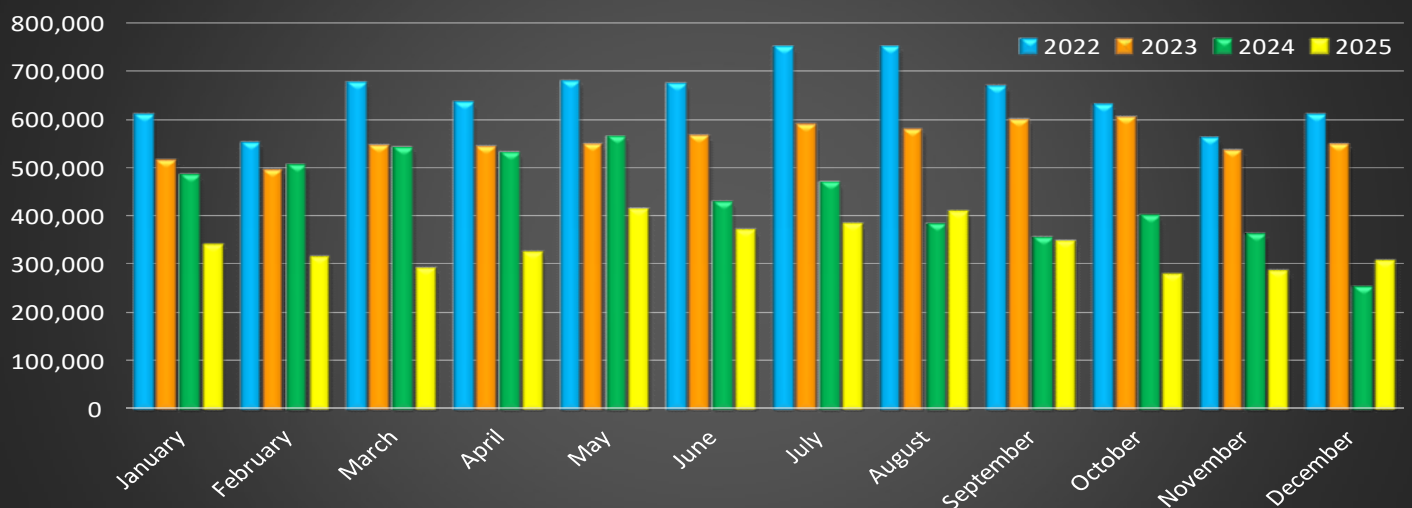

PureSource Water, Inc. is now officially 25 years old! Martin's parents, Michael and Opal, had been helping keep the water flowing for many years, then incorporated PureSource in May 2001. The Cavanaugh's started the water system about 40 years before that. Much work and many upgrades have improved the system over all those years. Happy Anniversary!

## WATER USE CONTINUES TO DROP!

Through a combination of your continued conservation and our efforts to find and repair leaks, water use has continued to drop at PureSource. We have solid data going back to 2010, and water use has never been as low as it was over the past year. We really appreciate all that you do to keep your use low and to find and repair any leaks on your property. Keep up the good work! We have been steadily installing meters and using those to help us identify and get leaks repaired more quickly too. We have also put in a lot of work to locate and repair water main leaks when they occur. This has certainly come at a cost, but the chart below shows that all of this work has been paying off.

## 4<sup>th</sup> BEST TASTING WATER IN CALIFORNIA!

We recently attended a training conference put on by the California Rural Water Association (CRWA). This was one of the ways that we work to satisfy our continuing education requirements and stay abreast of new regulations, knowledge, and opportunities. At this conference, they hold a competition for "Best Tasting Water in California". This year, 14 water companies entered their water sample, and PureSource Water came in 4<sup>th</sup> place! Judges ranked the entries (without knowing who they were from) for clarity, bouquet, and taste. Congratulations to the City of Dunsmuir for taking the top honor. Located near Mt. Shasta, their water comes directly from a mountain spring and, like our water, does not have any chemicals added to it.
